

Press Release

Wave XL - The Perfect Wave was worth waiting for

Only a curtain from Silent Gliss can make waves whilst at the same time radiating tranquillity and harmony. With the new Wave XL we have given the classic a spectacular new appearance. It could be regarded as a design feature. Or, with a total lack of modesty, as the most beautiful contemporary curtain in the world.

Wave XL is a striking new design confection style for most of Silent Gliss' hand operated, cord operated and electric curtain track systems.

With Wave, Silent Gliss has already successfully proven that traditional curtains can be turned into a striking contemporary design element.

The new confection style Wave XL takes this already effective design to an even higher level. The waves are generously designed and offer a smooth and continuous wave effect.

Wave XL is especially designed for high and large application areas such as lobbies and lofts with large glass surfaces and high ceilings. The system reflects the current trend towards smooth, rounded forms and shapes in today's interior decoration.

The following Silent Gliss systems can be confectioned with Wave XL:

<i>Hand Operated Curtain Track Systems</i>	6020, 6290, 6380
<i>Cord Operated Curtain Track Systems</i>	3840, 6120
<i>Room Divider / Cubicle Track Systems</i>	6100, 6103
<i>Electric Curtain Track Systems</i>	5400

Silent Gliss Wave XL

Innovative design effect through generously designed Wave forms.

The design with generous waves has a calmative effect and emanates an easiness like no other design before.

Wave XL blends in with current round forms in today's architecture and interior designs.

Wave XL offers new alternatives for high and large Application areas such as lobbies and entrance halls.

The Wave XL confection combines classical elements with contemporary design.
