Electric Operated Curtain Track Systems Silent Gliss 5200 & 5220

Perfect for the medium weight range, the Electric Curtain Track Systems 5200 and 5220 offer silent operation and electronic end-stops. System Silent Gliss 5200 is applicable with our sensational Wave and Wave XL curtain heading systems and can be equipped with Manual Override as well which enables the opening of the curtain by hand in the event of power failure and emergency.

With their new top class low voltage motors Silent Gliss 9040 and 9041 with integrated receiver, combined with the proven and further fine-tuned track system, the two new products stand for unmatched compactness and comfort.

Furthermore, both systems Silent Gliss 5200 and 5220 are very flexible in their applications and can be fully integrated in all kind of building management systems due to the open architecture of the new motors. This makes those systems well suited for the contract as well as for the retail market.

Comfortable operation from anywhere in the room is possible through our Radio Remote Control System Silent Gliss 9940 (only applicable with motor Silent Gliss 9041).

Silent Gliss 5200 & 5220

Silent Gliss 5200 – one channel track system

Silent Gliss 5220 – two channel curtain track system allowing unlimited overlapping
