

Press Release

Electric Operated Curtain Track System Silent Gliss 5090

Wherever you are, whatever you are doing, you can rely on our Electric Curtain Track System Silent Gliss 5090, the made-to-measure powered curtain system from Silent Gliss, to operate your curtains automatically.

For 50 years Silent Gliss has led the market for automated window treatments. The aluminum track and belt technology combines a touch of true luxury with an excellent deterrent to intruders. Silent Gliss 5090 supports a maximum curtain track width of 5 m and maximum curtain weight of 15 kg.

Three additional options

Infrared Set IR Silent Gliss 5093

The Infrared Set IR 5093 allows you to operate the curtains from the comfort of your seat.

Timer Set TL Silent Gliss 5092

This option includes a simple Control unit allowing you to select specific opening and closing times, giving you increased control. Also included is a dawn to dusk sensor which can be set to open and close the curtains according to levels of daylight. Either program can be overridden at anytime and the curtains can be manually operated using the open and close buttons on the timer unit.

Timer Set combined with Infrared Set

The third option includes our Timer Set TL 5092 in combination with the Infrared Set IR 5093 giving you the total control over your system.

With Silent Gliss 5090 let your curtains look after themselves – and your home!

Silent Gliss 5090

Silent Gliss 5090 – perfect adaptable for every room situation!

The standard operating method lets you control the system Silent Gliss 5090 at the touch of a button.

Infrared Set IR Silent Gliss 5093

Timer Set TL Silent Gliss 5092

Both sets combined – for the ultimate control over your system.
